

Featured Development Projects

We have publicized a number of our development projects, many of which have existing power purchase agreements. Each family of projects consists of several phases of 50 megawatts or larger.

Jeffers Wind Energy Center

- Located in Cottonwood County, Minnesota
- Construction of first 50 megawatt phase is complete
- Xcel Energy is the offtaker

Emmet County Energy LLC, formed in 2005

- 200 megawatt family of projects located in Emmet and Dickinson Counties, Iowa
- Collectively known as the NorthStar Wind Farms
- Letter of Intent in place to sell power to a utility and to sell a portion of the project
- Will be operational by 2009

M-Power LLC, formed in 2006

- 430 megawatt family of projects located in Griggs and Steele Counties, North Dakota
- North Dakota's largest community-owned wind energy development
- First two phases (150 MW) will be operational in 2009

High Country Energy LLC, formed in 2007

- 300 megawatt family of projects located in Dodge and Olmsted Counties, Minnesota
- When operational, it will be the largest C-BED (Community-Based Energy Development) in Minnesota
- First 150 megawatt phase committed to Wisconsin Public Service Corporation

Dakota Wind Energy LLC, formed in 2007

- 750 megawatt family of projects located in Day, Roberts, and Marshall Counties, South Dakota
- The first large-scale community wind project in South Dakota

Root River Energy LLC, formed in 2008

- 250 megawatt family of projects located in Fillmore County, Minnesota

Lake Country Wind Energy LLC, formed in 2008

- 350 megawatt family of projects located in Meeker and Kandiyohi Counties, Minnesota
